Start date: July 1st, however flexible

Application deadline: April 30th of the year prior to starting

Contact: Cecilia Donnelly (613) 696-7273

Fellowship Director: Dr. E. Stadnick

What we offer you

This is a 1-2 year fellowship dedicated to the management of patients with advanced heart failure including cardiac transplantation and advanced mechanical support (left ventricular assist devices). Fellows will learn how to manage these patients both acutely in the in-patient setting and chronically in out-patient clinics.

Fellows are responsible for rounding on the heart failure service and attending clinics. There will be a small component of on-call work (1 weekend/month).
