

## INFECTIOUS DISEASES

### Antimicrobial Stewardship

---

#### Application details

**Prerequisite(s):**

Successful completion of adult infectious diseases training (Royal College of Physicians and Surgeons of Canada, or equivalent)

**Estimated % clinical workload:**

8 weeks of inpatient service; no outpatient

**Number of positions annually:** 1

**Duration:** 12 months

**Start date:** July 1<sup>st</sup>, flexible

**Application deadline:** November 30<sup>th</sup>

**Contact:**

Li Kwong-Jedrzejczak ([lkwong@toh.ca](mailto:lkwong@toh.ca); 613-737-8899 ext. 74184)

**Fellowship Directors:**

Dr. Kathryn Suh ([ksuh@toh.ca](mailto:ksuh@toh.ca))

Dr. Caroline Nott ([cnott@toh.ca](mailto:cnott@toh.ca))

---

#### What we offer you

The Division of Infectious Diseases, University of Ottawa, offers a one-year fellowship in Antimicrobial Stewardship. Building on the fundamental knowledge gained during subspecialty infectious diseases training, this fellowship provides theoretical and practical experience that will allow you to implement and manage a hospital-based antimicrobial stewardship program.

You will work most closely with the Antimicrobial Stewardship Program (ASP) team (two ASP physicians, and dedicated ASP pharmacists). Regular interaction occurs with infectious diseases faculty and trainees, pharmacists, clinical teams, and infection prevention and control and quality department members. Opportunity exists to collaborate with local and regional partners, such as Public Health Ontario.

The 12-month program includes 8 weeks of clinical inpatient consultation service as attending ID staff, split between both inpatient campuses, with some overnight and weekend call. Involvement in education (e.g. of medical students, residents, pharmacists) and ASP quality improvement project(s), and completion of a relevant research project, are also expected. We also provide the opportunity to gain added experience in leadership, quality improvement, epidemiology and statistics, and antimicrobial stewardship in pediatrics.
