Application details

Prerequisite(s): CV, personal letter, 2-3 reference letters, funding source letter confirming sponsorship, translated medical certificate, PGY5 or greater, Completion of Neurology subspecialty training

Estimated % clinical workload: 75%

*Special consideration will be for clinician scientist fellowships for 2 years with strong research component

Number of positions annually: 1

Duration: 1 Year

Start date: July 1st

Application deadline: Nov 15th

Contact: Janis Amell-Crawley, jacrawley@toh.on.ca

Fellowship Director: Dr Jodi Warman (Chardon)

What we offer you

The University of Ottawa Neuromuscular Fellowship is a 1-2 year program emphasizing clinical bedside and clinical research experience studying neuromuscular disorders (NMDs). The primary NMD fellowship site is based at the Ottawa Hospital, Civic Campus, in Ottawa, Canada. The Ottawa Hospital strives to provide compassionate and evidenced-based care, with an emphasis on tertiary-level and specialty care for patients in Eastern Ontario. The NMD Fellow may also attend NMD clinics at the General Campus, as well as the Children's Hospital of Eastern Ontario (neuromuscular or neurogenetics clinics).

The TOH NMD Fellow will be exposed to outpatient, inpatient and emergency management of neuromuscular disorders. NMD teaching will take place through didactic sessions scheduled throughout the year, neuromuscular clinics, journal clubs, clinical and bench research, extensive electromyography (EMG) and nerve conduction study (NCS) clinics, and inpatient/emergency consultations.
