Application deadline: March 31

Contact: Crystal Lameira
613-737-8899 ext 73994

Fellowship Director: Dr. Douglas McKim

What we offer you

The qualified Neuro-Respiratory Fellow will be a highly motivated learner and clinician. The fellowship will be undertaken at the Ottawa Hospital Rehabilitation Centre and the Ottawa Hospital, under the direct guidance and supervision of Dr. Douglas McKim, Medical Director (co-chair of the first Canadian Guidelines on Home Mechanical Ventilation).

Fellows are involved in the assessment and care of patients enrolled in the Respiratory Rehabilitation Program as well as patients with neuromuscular diseases (NMD), both in the outpatient clinics and within the hospital.

With one-on-one supervision, fellows will learn to investigate and recognize signs of inadequate cough capacity, aspiration risk, and ventilatory insufficiency.
