Start date: flexible, generally July 1st

Application deadline: Inquiries and applications are accepted anytime

Contact: Jeanne Lemaire jlemaire@toh.ca or 613-738-8400 ext. 82239

Fellowship Director: Dr. Amel Arnaout

What we offer you

The Division of Endocrinology and Metabolism Fellowship in Thyroid and Thyroid Cancer offers a customizable program depending on your interest. A University of Ottawa Certificate of Completion is provided upon successful completion of the fellowship training.

We have a dedicated thyroid cancer clinic as well as regular thyroid nodule clinics where ultrasound is used for performing fine needle aspiration biopsies.

We encourage trainees to be involved in a quality improvement project and a research project that may involve a systematic review and to write a case report. Fellows are encouraged to attend at least one meeting such as the American Thyroid Association Meeting and to submit an abstract at that meeting. Fellows usually attend 1-2 clinics per week depending on their research component. Fellows are expected to attend our academic rounds including the monthly multidisciplinary rounds with nuclear medicine, diagnostic imaging, thyroid surgeons. As well we have quarterly pediatric thyroid multidisciplinary rounds and a Cancer Care Ontario supported Community of Practice that meets quarterly in regard to the topic of thyroid nodule and thyroid cancer.
